Course Description:

This course will focus on Korean boy group, BTS, **analyzing** their influence through an academic lens. Some of the content we will cover includes the artists' history, image, and philanthropy. The class attempts to **define** their impact by discussing globalization and media portrayals. Students will be able to reflect on their own perspectives regarding the intersection of culture, language, and identity by **observing** BTS' rise to fame in both the Eastern and Western hemispheres.

Learning Objectives:

- Learn about the world's biggest music group
- Examine possible reasons for their success
- Analyze BTS's career from history to present
- Think critically about the impact of music in a globalized world
- Study intersectionality through BTS' identity and career

Course Structure:

In-class sessions will consist of lectures, screenings, and group discussions. Lectures will focus on introducing material, while the screenings will supplement the material. We will then open the floor for group discussions which will focus on attempting to answer questions we have prepared for each class session.

Out-of-class assignments will consist of weekly reflections that require analyzing concepts discussed in class. Additionally, the readings due each week will aid in

preparation for the following class. The final is an open-ended project that will provide students a chance to showcase and incorporate what they have learned. The format can be anything from a paper to a presentation to artwork, as long as it has been approved by the facilitators beforehand.

Course Requirements:

Prerequisites:

There are no prerequisites for this course. Anyone and everyone is welcome to take this DeCal.
